

# HIVE INSPECTION FORM v2.3

Apiary Location  Hive ID

Date and Time of Inspection

## Inspection Details

Pollen Gathering?  Nectar Flow  Weather

Purpose of Inspection

## Development Times for Honey Bees

Development (days)	Queen	Worker	Drones
Egg hatches after	3	3	3
Cells Capped after	8	8	10
Adults emerge after	16	21	24

## Hive Status

Queen Seen  Queen Marked  Eggs

Queen Cells  
 Emergency Cells  
 Swarm Cells  
 Supersedure Cells  
 Removed Queen Cells  
 Spotty Drone Brood?  
 Worker Brood in All Stages  
 Compact Brood Pattern?  
 # Frames of Foundation  
 # Queen Cells Remaining  
 # Frames with Brood  
 # Frames of Honey-Nectar  
 # Frames of Pollen  
 # Frames of Open Comb  
 # Frames bees occupy in brood chamber  
 # Supers in Place  
 # Supers Added

## Health

Signs of Disease  
 Good Temper  
 Small Hive Beetle Damage  
 Nosema Streaking  
 Signs of Varroa Mite Infestation  
 OA Treatment  
 Feed

## Notes and Actions Taken

Colony Condition  Weak  Marginal  Strong
